

**Ex:2.1**

**2.Look at the figure given. Here all sides are equal to 6cm and all angles are 90 degree.**

**Ans:**

$$\begin{aligned}\text{Perimeter} &= 12 \times 6 \\ &= 72 \text{ cm}\end{aligned}$$

**4. Calculate the perimeter of given composite shapes.**

**Ans:**

$$\begin{aligned}\text{Perimeter} &= 3 + 6 + 7 + 1 + 4 + 5 \\ &= 26 \text{ cm}\end{aligned}$$

**Ans:**

$$\begin{aligned}\text{Perimeter} &= 12 + 2 + 3 + 1 + 3 + 2 + 3 + 3 + 3 + 8 \\ &= 40 \text{ cm}\end{aligned}$$

5. ABC is an equilateral triangle of side 6cm. It is surrounded by a regular hexagon (a regular figure means all sides are equal and hexa means 6) whose perimeter is same as the triangle. Find the side of the hexagon.

**Ans:**

**Side of triangle = 6 cm**

**Let Side of hexagon= S**

**Given, perimeter of triangle = perimeter of hexagon**

$$6 + 6 + 6 = S + S + S + S + S + S$$

$$18 = 6 \times S$$

$$18/6 = S$$

$$3 = S$$

$$S = 3 \text{ cm}$$

**Side of a hexagon = 3 cm**

6. Find the side of the square, whose perimeter is the same as the rectangle of length 8cm and width 2cm.

**Ans:**

$$\text{Length} = l = 8 \text{ cm}$$

$$\text{Width} = w = 2 \text{ cm}$$

$$\text{Let side of square} = S$$

**Given, Perimeter of square = Perimeter of rectangle**

$$4 \times S = 2 \times (l + b)$$

$$4 \times S = 2 \times (8 + 2)$$

$$4 \times S = 2 \times 10$$

$$4 \times S = 20$$

$$S = 20/4$$

$$S = 5 \text{ cm}$$

**Side of square = 5 cm**
